**Be it resolved by the Franciscan University Student Government (SG) that:**  
\$10,000 be allocated to FUSG for the purchase and installation of 3 filtered water bottle stations around campus.

The following is a breakdown of costs:

3 Filtered Waterbottle Stations	\$7,000
21 Filters	\$200 each
Shipping, installation, labor	\$2,800
Total	\$10,000

**Recognizing that:**

- President Martinez and Vice President Gessler have been working with Physical Plant since April to provide this change.

- There are currently only two water bottle filling stations on campus, in the field house and in the St. Joseph Center. This would add a station on the first floor of Egan, CODA and the library.
- Jeff Johnson of Physical Plant and Vice President Gessler are working with the supplier for a bulk discount to bring down the costs.
- Physical Plant has requested we buy additional filters to cover the upkeep. These will last 2-3 years.
- Upkeep costs to FUSG would be about \$200 for every 3 years, as well as any other maintenance costs given by PP, not exceeding \$500. These costs should be added to the semester budget so they are accounted for when needed.
